RE: Rib River Bridge

NOV 26 2004

It has been a pleasure to do business with you and your company. It was great to see and work with the owner of the company on site. It is unusual to have that type of hands on control and knowledge on site as the project proceeds.

You are also to be commended for your level of cooperation and communication on this project. I was informed when things were scheduled and they happened without delay. I believe you did everything in your power to expedite this project to assure we had our bridge for this year's snowmobile/ATV season.

Thank you for a job well done. Please do not hesitate to use the Taylor County Forestry and Recreation Department as a reference.

Sincerely,

Brad Ruesch
Forest & Recreation Administrator

PS: May your skies always be filled with Mallards or Bluebills!
